

SSCOR QUICKDRAW® - Alkaline Battery Powered Portable Suction

Powerful suction designed to fit in your "first in kit"

The SSCOR Quickdraw fits in an airway bag or first in kit so it is easily carried to the patient's side. It is not necessary to charge it in the bag. It is powered by readily available AAA alkaline batteries or a SSCOR alkaline battery pack for extended run time. It is as efficient as a large aspirator and weighs only 2.6 pounds.

See the Specification Page for run times, vacuum levels and dimensions.

The SSCOR Quickdraw can function as an extremely efficient handheld suction or as a small, yet powerful and effective traditional suction pump based on the canister option that you choose.

The first medical aspirator to be powered by alkaline battery technology.
