

GO-PAP™

Disposable CPAP Device

The GO-PAP is a disposable emergency CPAP device that runs off of the barbed valve outlet on an O₂ source. It operates at 10LPM and delivers approximately 30% FiO₂. There is an adjustable PEEP (5, 7.5, and 10cm H₂O) valve integrated into the generator. The PEEP is independent of the flow, so you never have to worry about adjusting your flow to maintain your PEEP levels. Additionally, this completely disposable system offers integrated nebulization while maintaining a consistent flow to the patient.

40 Minutes of Run Time **

Delivers ~90LPM of flow

Nebulize with one tank using the Neb-Connect®

CAP Headgear

Adjustable PEEP

Neb-Connect®

Integrated Nebulization

Standard Headgear

**D-Cylinder Tank
