

ViaValve™ Safety IV Catheter

Peripheral IV catheter with integrated blood containment technology and fully encapsulated needle protection.

Help Minimize Blood Exposure While Reducing the Risk of Accidental Needlestick Injury

The ViaValve™ safety IV catheter combines blood-containment technology with fully encapsulated needle protection to help your efforts to reduce the risk of needlestick injury and comply with Occupational Safety and Health Administration (OSHA) bloodborne pathogen standards.¹

Help minimize the risk of blood exposure

Avoid blood leakage during catheter insertion and setup with an integrated blood-containment valve.

Reduce the risk of needlestick injury

Avoid accidental needlesticks and needle exposure with clinician-controlled forward shielding needle encapsulation.

Avoid multiple insertion attempts

Help ensure the catheter is properly in the vessel on the first stick with flash technology and FLASH-VUE™ early flash indicator on gauges 20, 22 and 24.
