

NIMS/ICS Area Command Vest Kit TM by DMS

DMS-05305

Area Command is an expansion of the incident command function, primarily designed to manage a very large incident or area that has multiple incidents. An Area Command can be established at any time that incidents are close enough that oversight direction is required among incident management teams to ensure that conflicts do not arise.

Separate from an EOC, the function of the Area Command is to develop broad objectives for the impacted area and coordinate the development of individual incident objectives and strategies. In addition, Area Command will set the priorities for the use of equipment and manpower available to the area.

9 - Position Vests

NIMS/ICS Law Enforcement Vest Kit TM by DMS

DMS-05309

NIMS require that response to all domestic incidents utilize a common management structure. Until now, there have been no standards for domestic incident response that reach across all levels of city, state and federal government. The Law Enforcement Branch Vest Kit produced by DMS identifies the best practices of police agencies that have taken part in Federally funded Top-Off drills during the last six years. This kit would be used to establish a Law Branch within the ICS Multi-branch Response Organization.

8 - Position Vests

- Law Enforcement Branch Director
- Perimeter Control Group Supervisor
- Force Protection Group Supervisor
- Traffic Control Group Supervisor
- Special Weapons & Tactical Group Supervisor
- Crime Scene Investigator Supervisor
- Evidence Group Supervisor
- Bomb Ordinance Disposal Group Supervisor
