

3M™ Surgical Clipper 9661

For use with 9660 blade

Unique pivot head
conforms
to body contours

- The only surgical clipper with a pivot head design
- Pivoting blade conforms to body contours, skin folds and creases
- Away-from-the-skin cutting blade minimizes potential for nicks or cuts
- Has a nick rate of <1%, compared with other clippers' higher nick rates*
- Accommodates flat and angled clipping styles
- Cuts through all types of head and body hair in a single pass
- Clean by rinsing or wiping with disinfectant
- Also available, the 3M™ Surgical Clipper Specialty Blade 9690 for head and heavy body hair removal

How to use

3M™ Surgical Clipper 9661

For use with 9660 blade

Changing Blades

Attach

Remove backing from the blade packaging, hold clipper body at a 45-degree angle and snap on single-use blade 9660.

NOTE: An audible snap indicates the blade is securely attached.

Remove

To remove the blade, use your thumb to "pop off" the used blade into a sharps waste receptacle.

NOTE: Always use a new blade for each patient to avoid cross-contamination.

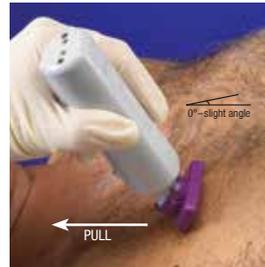

Clipping

Push

Position the clipper like a pencil with the clipper blade flat or at a slight angle on the skin surface. Gently push the clipper forward, against the direction of the patient's hair growth.

NOTE: Do not use excessive pressure to push the clipper down on the patient's skin.

Pull

Position the blade flat or at a slight angle on the skin surface and gently pull the clipper toward you.

NOTE: Do not rake the blade across the patient's skin.

Cleaning

Rinse

With the clipper uncorded and in the "off" position and the blade removed, rinse the handle under warm running water. Dry thoroughly before recharging or reusing.

NOTE: Do not submerge clipper body in any liquid solution

Wipe

With the clipper in the "off" position and the blade removed, wipe the clipper handle with an alcohol or disinfectant wipe.

Charging

Charge

Before initial use, charge clipper for 18-24 hours. After each use, store the clipper handle in the "off" position in the plugged-in charge stand. Clipper provides approximately 100 minutes of cordless run time on a 12-14 hour recharge.

NOTE: There is no risk of overcharging, but after the initial use, charging for more than 14 hours will not result in longer run time.

Refer to package insert for warnings and more detailed instructions.
