

# Medical Support Pack

The Thomas Medical Support Pack is specifically designed to carry I.V. fluids and drugs necessary in the care of critically ill or injured patients.

This can be used as a stand-alone pack or as an excellent support pack to the Thomas ALS pack when more I.V. equipment and Medications are needed.

This pack features:

- 3 removable I.V. bags
- 1 removable drug case
- 3 removable exterior pouches
- 1 large exterior pocket for additional equipment and supplies

All removable cases and pouches are securely fastened in the pack to avoid loss of equipment and supplies, and are easily removed when needed. The Medical Support Pack is useful as an advanced life support specialty pack for trauma, burn, cardiac, pediatric, or obstetrical transports.

## Thomas MSP Pack Contains the following Life Support components:

Top handles allow easy carriage. Two point shoulder harness provides backpack carriage. Back pocket covers and protects shoulder straps. Support sections consist of extremely versatile removable support pockets and pouches for carrying a wide variety of equipment and supplies. Clear pouches allow for rapid identification of supplies and quick re-stocking.

### Cardiac Section (Drugs)

Each MSP Pack also includes the best padded drug box in the industry. Our drug box is protected by two pieces of polycarbonate plastic and three separate 1/2" pieces of self-enclosed Evazote foam. The Thomas Padded Drug Box is able to securely hold over 50 separate drug vials plus syringe boxes and printed material. Our Padded Drug Box also contains a separate narcotic section which can be locked assuring that unauthorized tampering of certain drugs does not occur.

### I.V. Bags (TT500/TT510)

Intravenous Fluids and accessories are contained with three separate and fully self-contained IV pouches. All equipment necessary to start a peripheral intravenous line can be contained within each of these pouches, including 1000 ml of liquids, 6 IV catheters, tubing, pressure infuser, gauze, and swabs.

Each pouch is easily removed by opening the flap pocket which holds the pouches within the pack, or by advancing the pouches out of the flap pocket by pulling the handle forward and upward. This allows for rapid dispersion of intravenous equipment at a scene with multiple victims. The contents of each pouch can also be set up differently to accommodate adult or pediatric patients. The handle allows for easy carriage and can hold a tourniquet if desired (not included).

Upgrade your Medical Support Pack with the NEW Deluxe Drug Kit for an additional \$18.45.
